Software Test Engineer with 7+ years of experience in Manual and Automation Testing, specializing in Selenium (Java), API Testing, and Agile methodologies. Proven track record of improving test coverage by 90%, reducing manual effort by 60%, and enhancing defect detection efficiency. Methodical QA professional with good analytical skills, organized nature, and strong attention to details. Excellent collaboration, communication & documentation skills.

## TECHNICAL AND SOFT SKILLS

**Test automation:** Selenium WebDriver, iTAF (Insurance Test Automation Framework), COFTA (Cognitive Functional Test Automation).
**Tools & frameworks:** Maven, POM, TestNG, Eclipse, IntelliJ, Postman, DBMS, Git, JIRA, Confluence, TFS, Azure DevOps
**Languages, Scripts & more:** Java, CPP, HTML, CSS, Bootstrap, SQL, Technical documentation.
**Responsibilities:** Analysis, Requirements gathering, Test Planning and Estimations, Testcase creation, Test execution, Functional testing, Manual testing, Automation Testing, Mobile Testing, API testing, Bug Reporting, Smoke/Sanity, Regression testing, Agile/Scrum.
**Soft Skills:** Critical & Analytical thinking, Quick learner, Creative writing, Communication, Time management.

## PROFESSIONAL EXPERIENCE

**Deloitte, Pune, India** *Software Engineer in Test | 10/2021 – 10/2024*

- Highly skilled in Manual and automation testing, analysis, estimations, test case creation and execution talents. Developed training modules and Conducted KT sessions.
- Mentored 7 QA testers on best practices for test processes improving their productivity by 30%.
- Developed and maintained a Selenium with java- based automation framework, which saved time, reducing manual testing efforts by 60% and increasing test coverage from 45% to 90%.
- Delivered high-quality releases by combining manual expertise with scalable automation strategies.

**Accenture, Pune, India** *Test Engineer Analyst | 06/2021 – 09/2021*

- Improved software testing life cycle (STLC) efficiency by 30% through innovative test planning and execution.
- Strategized and Strengthened defect management practices by collaborating with teammates, cutting defect turnaround time by 40%. Held Demo sessions.
- Hands-on experience with, functional, Regression, Ad-hoc, Exploratory and End-to-End testing. Decreased post-release bugs by identifying and reporting defects.

**Majesco, Mumbai, India** *Software Engineer in Testing | 10/2018 – 05/2021*

- Reported bugs and followed defect life cycle using TFS (Team Foundation Server) for bug tracking.
- Followed Agile model reducing the software development lifecycle time by 30%.
- Implemented functional testing and API testing which contributed to a 60% improvement in system stability.

**Opsfinity Technologies, Bangalore, India** *Software Tester | 10/2017 – 05/2018*

- Authored and maintained well-organized, efficient documents using Jira to track system defects and ensured 95% documentation of testing processes.
- Detected and reported 60+ software bugs and glitches using manual testing, achieving a 95% fix rate.

## EDUCATION

**National Institute of Technology, Durgapur, West Bengal, India**| Master of Computer Applications | 06/2017 | 7.3 CGPA
**Acropolis Institute of Technology and Research, Indore, MP, India** | Bachelor of Computer Applications | 06/2014 | 7.5 CGPA

## ACHIEVEMENTS, AWARDS AND CERTIFICATIONS

- Secured All India Rank (AIR) 458 in NIMCET 2014.
- Developed creative skills, such as event management, public speaking and blogging.

**Certifications:** Agile methodology | P & C -L1- Property & Causality Insurance.

**Spot Award:** Recognized for performance excellence through Spot Awards in Deloitte for all 3 consecutive years.
